Subject: RE: R5 CSD Sampling Update

Hi Cheryl,

Quick update: I've received the nitrate concentration results from UNL (I'll forward them to you in a separate email) but not the N-15 isotope results yet. Since the specified turnaround time for the analysis is 28-42 days, they have until early to mid-next week to provide the rest of the results.

Please let me know if you have any questions!

Sincerely,
Daisy Wang

Hi Cheryl,

I reached out to them last week and Daniel said that the results would be ready by early this week. If I don't see anything by tomorrow I'll follow up with him again.

I'll send you the results as soon as they come in.

Thanks,
Daisy

Hi Daisy:

Should I contact University of Nebraska Laboratory, I have not heard from them and just wondering when I should get the results?

Sincerely,

Cheryl Burdett

Hi Cheryl,

Yes – It was on the QAPP but I wanted to double check since it wasn't in the summary email that you sent me on 5/7. Either way, the lab provided chloride results so we should be all set! I was concerned that they performed an analyses that you did not request.

Thanks, and have a great weekend!

Yes, I thought that was on my QAPP. I know that we discussed taking things off, but when I talked to Ryan he said to go forward with the entire sampling plan.

Hi Cheryl,

Just checking – did you also request for Chloride (SM4500-CL-E) for the Wisconsin State Lab of Hygiene?

Thanks,

Daisy Wang

Hi Cheryl,

I hope everything went smoothly in the field last week! Can you please let us know the final number of samples shipped (and analyses requested) to UNL and the Wisconsin State Lab of hygiene?

Thanks!
